

## Four-step application

1 Open device and place the syringe inside it.

2 Load the device and close it.

3 Remove the safety cap and place it on the other end to function as the trigger.

4 Remove the cap from the syringe and inject the medication.

🇬🇧 For single doses with pre-filled ready-to-use 1 ml syringes containing the exact dose.

Easy to transport. Personal use.

Ergonomic size for convenient and accurate manual usage.

Top-quality polymers that are highly resistant to falls and impacts.

User's manual.
